

Protective clothing

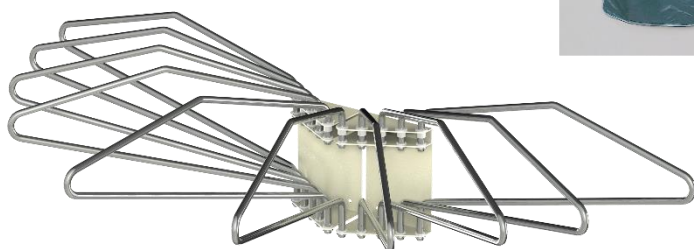

Multiform wall racks for protective clothing

100 Series (for 1 to 10 garments)

A timeless design

When originally designing these Kenex wall racks, we considered the need for a convenient and effective way of storing protective clothing. Every design decision was made with the user in mind. The result is a timeless design that is both functional & ergonomic and delivers many advantages.

Wall racks 100/5L & 100/5R mounted side-by-side.
Capacity: 10 garments.

Wall rack 100/5R
Capacity: 5 garments

Features

- > Occupies minimum wall space.
- > Clothing is clearly arranged.
- > Shoulder shaped hangers extend the service life of protective clothing.
- > Hangers fan out 180° from the wall for immediate access, or fold parallel even when fully loaded.
- > Left & right racks, mounted together provide storage for up to 10 garments with optimum use of available space.
- > Easy to install.

100 Series wall racks

- > **Wall rack 100/1**
This rack is recommended for storing a single garment, and provides the smallest possible protrusion from the wall. Supplied with a swivel hanger and occupies a width of only 61cm
- > **Wall racks 100/2L or 100/2R**
These racks provide the most effective way of storing two garments. Each hanger can fan out for access or fold flush as required. They protrude from the wall by 7cm and occupy a width of only 64cm
- > **Wall racks 100/5L or 100/5R**
When combined these racks provide effective storage for up to 10 garments, and take up little space in a room.
See overleaf for details

TIP

Folding x-ray protective garments, or hanging them over sharp objects will reduce their service life and could cause harm.

Improper storage of any x-ray protective garment will cause damage to the internal material. As this is not visible from the outside, there exists the possibility of dangerous defects going unnoticed.

X-ray clothing should be correctly stored after use and checked at regular intervals.

Protective clothing

Technical specifications

100 series multiform wall racks construction

Metal structure painted a white colour (RAL 9010), with chromium plated swivel arms.

Dimensions

Height all models: 34 cm

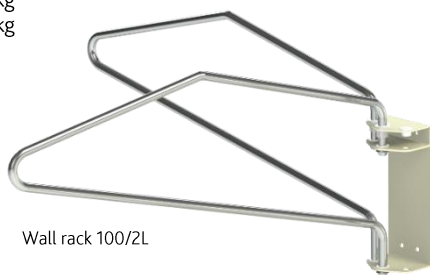

Transport packaging details

1 carton: 72 x 32 x 11 cm
