

Mobile radiation shield

310/B-3 (Height adjustable)

Height adjustable x-ray shield

Superior design & construction make this mobile shield ideal for use in confined areas close to the tableside

Features

- > This shield is compact and easily manoeuvred into position.
- > It occupies minimal space when lowered after use.
- > The 70 cm wide lead acrylic window provides an uninterrupted view of procedures. It is counterbalance, so has no apparent weight, and can be raised to a height of up to 188 cm, for complete protection, or lowered in seconds to 115 cm for access to the patient.
- > Equipment hand controls, attached to the optional accessory rail, allow personnel to operate within a safe zone created by the shield. The full width rails are factory fitted and available in two sizes: 8 x 25 mm & 10 x 25 mm.
- > Lead equivalents: Window 0.5 mm, lower panel 1.0 mm.
